SUMMARY

Final-year Computer Science student with strong academic performance and a passion for software development. Skilled in Python, JavaScript, React.js, and Django, with hands-on experience developing projects such as a blockchain-based identity verification system and a voice-enabled virtual assistant. Eager to learn continuously and contribute to innovative software engineering projects.

EDUCATION

B.TECH, COMPUTER SCIENCE AND ENGINEERING GEETHANJALI COLLEGE OF ENGINEERING AND TECHNOLOGY, CHERIYAL, HYDERABAD, India	Oct 2022 - Present
GPA: 7.6	
MPC-Intermediate MJPTBCWR junior college	Jun 2020 - Mar 2022
N.SAGAR PER:95%	
SSC Krishnaveni Talent School (GPA: 10.0)	Mar 2020

CERTIFICATIONS

Data Analytics Job Simulation, Deloitte	Jul 2025
Python for Data Science, IBM	Jun 2025
Java Advanced, Oracle	Sep 2024

PROJECTS

Decentralized Identity Verification System

- Blockchain-based document verification for certificates like passport, license, and graduation.
- Authorities issue and third parties verify documents instantly and securely.
- Users can upload documents and flag them as lost/stolen to prevent misuse.
- Built using IPFS for decentralized storage and Ganache to simulate blockchain.

Jarvis - Virtual Assistant

- Built a voice-enabled virtual assistant with speech recognition and text-to-speech.
- Integrated Spotify and Google Slides APIs for music playback and presentation automation.
- Automated web browsing with Google and YouTube search functionality.
- Developed file management operations for creating, deleting, and organizing files/folders.
- Added real-time weather, news updates, and AI-powered content generation via APIs.

SKILLS

- Programming Languages:** C, Java, Python
- Web Technologies:** CSS, Django, Express.js, HTML, Javascript, Node JS, React JS
- Databases:** MongoDB, MySQL
- Development Tools:** Eclipse IDE, Git, GitHub, Vs code
- Languages:** English, Telugu, Hindi
