Projects

Tasks Generator – AI-Driven Engineering Planning Tool

- Built an AI-driven planning tool that converts feature ideas into structured user stories and engineering tasks.
- Implemented dynamic task editing, categorization, and export (TXT/Markdown) functionality.
- Designed server-side API routes and integrated @google/genai SDK for AI processing.
- Deployed production-ready application on Vercel with environment configuration.

Restaurant Reservation System (MERN Stack)

- Developed a full-stack reservation system using MongoDB, Express, React, and Node.js.
- Implemented JWT-based authentication and role-based Admin Dashboard.
- Designed RESTful APIs with CRUD operations and real-time reservation validation.
- Built a responsive UI with secure backend integration and MongoDB database management.

Activities

- Competitive Programming: Solved 200+ DSA problems on LeetCode, HackerRank, and Codeforces.
