Projects

EcoTrace – QR-Based Product Transparency Sustainability Tracking January 2026

- Designed a QR-code-based web system for instant access to product sustainability and traceability details.
- Developed modules for product lifecycle, batch tracking, and sustainability data management.
- Implemented secure centralized backend storage for product data, sustainability metrics, and QR mappings.
- Enhanced consumer trust and transparency by replacing static eco-labels with interactive digital information.
- Easy consumer access to transparency data through simple QR code scanning without dedicated applications.

Decentralized Identity Verification System October 2025

- Developed a blockchain-based identity verification system for documents like passports and certificates.
- Used IPFS for decentralized storage and Ganache for blockchain simulation.
- Enabled instant verification by authorities and third parties.
- Ensured documents are secure, tamper-proof, and verifiable using blockchain.

Restaurant Reservation System (MERN Stack) May 2025

- Built a full-stack restaurant reservation platform using MongoDB, Express, React, and Node.js.
- Enabled users to book table reservations with real-time validation.
- Developed a secure Admin Dashboard with JWT Authentication
- Implemented CRUD operations to manage reservations efficiently.
- Ensured responsive UI and reliable backend with MongoDB storage.

Activities

- **Competitive Programming:** Solved 300+ DSA problems on LeetCode, CodeChef, HackerRank, and Codeforces.
